

# Long range Rifle Shooting

## PGR&GC Black Water rd Range

Currently we are considering opening the Black Water rd Range to long range rifle shooting (300-600 yards). In order to make this a reality we need to have strict supervision in place during all shooting. What we are looking for are volunteers to go out to the range and supervise. We are open to availability of any day or evening as this is how we plan to administer the program:

1. A list of volunteers will be developed with dates and times that can be **committed to** (see below why this commitment is so important)
2. A calendar will be posted on the website with both day and time that the range will be open. People will then sign up and if enough people sign up the date will go ahead.
3. If not enough people sign up to shoot that day may be cancelled. As it may be difficult to call people to cancel it is imperative that if you say you will supervise you must show up otherwise people show up with no access or ability to shoot
4. If a decision to cancel is made then the website will be adjusted to reflect the cancellation.
5. It is the responsibility of the shooters to check the website within 2 hours of the scheduled start time to confirm that the shoot will happen.

To sign up and volunteer to supervise a shoot please make sure you have the following prerequisites;

- Accredited Range Officer or
- A member of the club with a sound knowledge of safe range procedures

Please sign up on the website and include the following info;

- Name
- Date and times that you can supervise “shooting days”

Thanks,  
The Executive
